

## SAASPASS Active Directory

### Integration

#### INTRO:

SAASPASS Active Directory integration allows you to continue managing your users and role groups as you always do, allowing you to synchronize SAASPASS with your AD seamlessly, avoiding duplication of tasks. Once you add your Active Directory in the SAASPASS web admin console and install the SAASPASS Active Directory Agent, in just a few steps your user accounts will be ready to be protected. With its automatic synchronization, SAASPASS will always be up to date with the latest changes to your Active Directory accounts.

#### ADDING ACTIVE DIRECTORY:

1) Go to G&U and click on Active Directory

ClipOrg / Groups & Users

### Groups & Users

## CLIPORG.CO - ACTIVE DIRECTORY

**ACTIVE DIRECTORY DOMAIN**  
cliporg.co

You have added a new Active Directory domain.

In order to import your users, please download the SAASPASS Active Directory Agent. Install the agent under your domain controller and adjust your synchronization and user verification settings.

Once you have activated the agent, you may no longer edit your domain name.

DELETE

## INSTALLING AND ACTIVATING ACTIVE DIRECTORY AGENT:

1) Install and launch SAASPASS AD Agent. Enter your Active Directory admin credentials.

SAASPASS Active Directory Agent Wizard

Active Directory Username

Active Directory Password

Active Directory IP Address

You have installed the SAASPASS Active Directory agent. Enter your Active Directory credentials to begin setup and synchronize your Active Directory with SAASPASS Groups & Users.

CANCEL NEXT

2) Then enter the Activation Code given to you in SAASPASS Admin portal.

**Active Directory Domain**  
cliporg.co

**AD Agent Activation Code**

Enter your Active Directory domain and the Active Directory agent Activation Code from the SAASPASS Portal. The connection will be validated and the SAASPASS Active Directory agent will be activated. Click 'Next' to proceed with synchronization and setup.

CANCEL NEXT

3) If all credentials are valid; Agent asks you set up the synchronization with SAASPASS. Choose the Organization Units that will be uploaded to SAASPASS Groups and Users and select between manual or automatic account synchronization. SAASPASS recommends to set up an automatic synchronization in order to keep your user accounts up to date in SAASPASS

**Active Directory Synchronization**

Manual  
 Automatically

Synchronization Time

Weekly  
 Every 3 days  
 Daily  
 Custom

Setup when the SAASPASS Agent will synchronize. Manual synchronization is always possible.

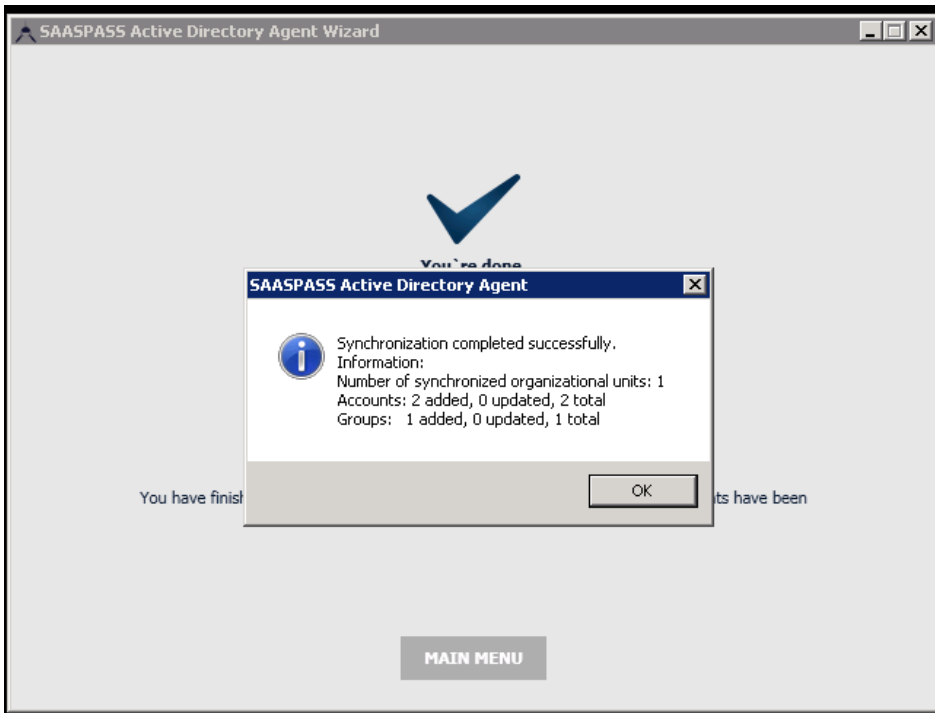

**Organizational Unit**

OU=Domain Controllers,DC=cliporg,DC=co  
MyCompany

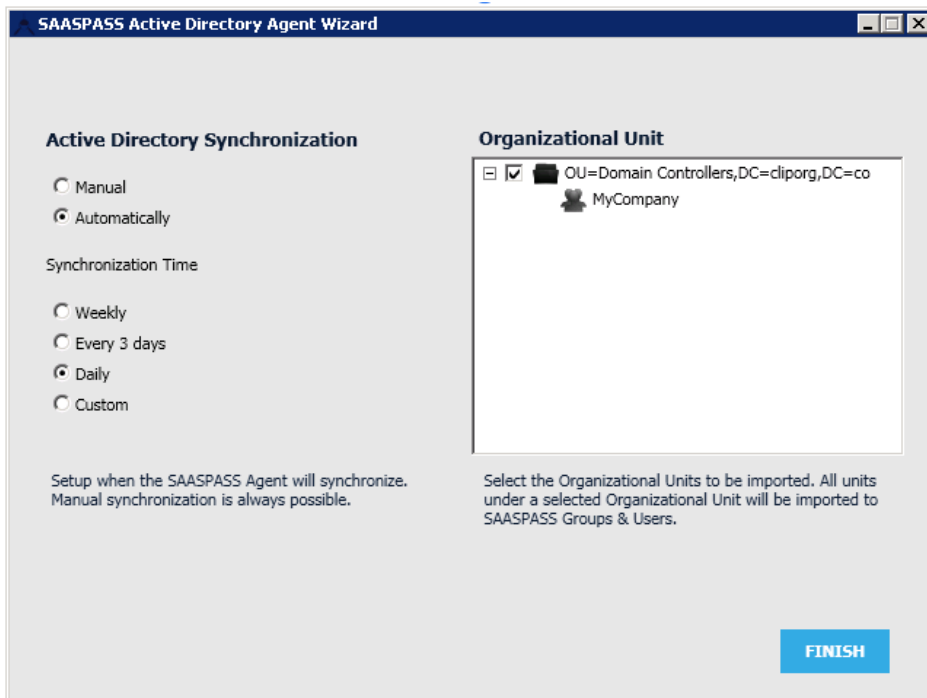

Select the Organizational Units to be imported. All units under a selected Organizational Unit will be imported to SAASPASS Groups & Users.

FINISH

4) SAASPASS connects and pull the user accounts. The result of the synchronization is displayed.

5) Continue and the main Agent menu is displayed. Your Agent is fully configured and your user accounts uploaded on your SAASPASS administrator portal.

## BACK TO SAASPASS ADMIN PORTAL:

Open again your company admin portal and go to Groups&Users.

Under the Groups tree you can see your Active Directory added, created and the different groups of user accounts displayed.
